Hi, I tried to log into my chumba account today and it showed that it was randomly deactivated for violation of sweep rules 3.3 but I have not submitted any post cards at all in probably over 6 months. I have also not generated a single code within 6 months either, so im not sure why my account would randomly get flagged for violating postcard rules this randomly?. Is there a different reason why I can not log into my account or was it a mistake, since I still had unused sweep coins in my account?
